Work experience

2011-03 - 2016-07

Global Process Improvement Specialist, Sumitomo Electric Bordnetze SE, Wolfsburg

- Led cross-plant KAIZEN and shop-floor standardization across international sites, reducing process variation and improving throughput at plant level
- Conducted time studies and optimized workstations to increase operational efficiency and shorten production lead time
- Deployed global audit and benchmarking frameworks as lead auditor, aligning processes with customer requirements and reducing audit findings
- Acted as emergency process specialist resolving critical production and quality crises to restore OEM delivery and quality
- Managed international shop-floor standardization and training rollouts to embed repeatable process controls across plants

2016-08 - 2018-11

Quality Manager, SE Bordnetze SRL, Orhei, Moldova

- Built greenfield quality systems and team from scratch, achieving IATF certification on first attempt
- Implemented VDA, Formel-Q and IATF standards across five sections (80 employees) to improve product quality and OEM readiness
- Established supplier and customer interfaces as primary contact, reducing audit nonconformities and improving delivery reliability
- Planned and executed handover and local training programs to ensure sustained quality performance and process repeatability

2018-11 - 2020-01

Head of Quality & Product Service, Expondo Polska Sp. z o.o., Zielona Góra, Poland

- Led three departments (35 staff) to standardize procedures and KPI dashboards, increasing quality oversight and team performance
- Executed product corrections and process controls to reduce customer claims by 70%
- Reorganized warehouse locations to halve pick/put steps, cutting handling time and discrepancies
- Introduced work classification to streamline staffing and technical workflows, eliminating legacy backlog within three months

2020-01 - 2025-10

Director, GL Solutions Sp. Z o.o., Zielona Góra, Poland

- Planned and executed road construction and infrastructure projects with contract values of EUR 30–40k, delivering projects on schedule
- Co-founded and scaled a construction delivery operation to serve public and private contracts while ensuring regulatory compliance
- Coordinated site scheduling and machine usage to reduce rework and manual labor, improving on-time delivery and operational efficiency
- Managed project procurement and contractor interfaces to maintain quality and contract compliance

IT & AI Skills

Advanced Excel reporting (Pivot Tables, formulas, charts)
KPI dashboards & reporting
Data summarization & insight extraction
AI-assisted workflow automation
Prompt engineering for structured outputs
Responsible data use & privacy

Technical & Operational Skills

Process Engineering
Quality Management (IATF, VDA, Formel-Q)
Standardization & KAIZEN implementation
Root cause analysis (FMEA, 5 Whys, PDCA)
Project Management (CAPEX/OPEX)
Construction and site project delivery

Education

2012-2015	**Poznań University of Technology,** **Master of Science in Electrical Engineering** specialization: Industrial and automotive systems
2008-2012	**Poznań University of Technology,** **Bachelor of Engineering in Electrical Engineering** specialization: Microprocessor control systems

Language Skills

Polish	(native)
English	(fluent)
German	(intermediate)
Russian	(basic knowledge)
Romanian	(basic knowledge)

Interests

Systems thinking & workflow optimization, process automation & planning architectures, long-distance cycling, outdoor activities, hiking, fiction (e.g., fantasy/sci-fi) and non-fiction (decision psychology, NLP)
